<ul style="list-style-type: none"> <li>On-Task Performance</li> <li>Controlled Web</li> <li>Group Learning</li> </ul>	<ul style="list-style-type: none"> <li>Monitor Internet lessons and resources.</li> <li>Enforce web resources per student per class</li> <li>Dynamic peer learning analytics</li> </ul>

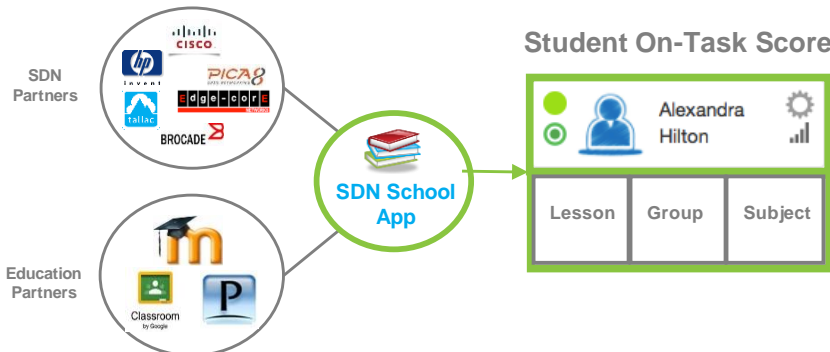

Improve Student On-Task Performance

Teacher Controlled Web Experiences

### How SDN Applications Change Value of Networks

Elbrys SDN School App is designed to work on programmable software defined networks. Combined with third party Learning Management Systems (LMS) platforms, the Elbrys SDN School App provides a new paradigm for teachers to customize classroom Internet experiences and improve student on-task analytics.

“The Elbrys solution is an excellent example of how end-user customers can reap the benefits of SDN, without the usual complexities of deployment. We see innovative new apps and services as the next step in SDN market growth.”

*Kevin Woods, Director of product management, Software Networking at Brocade.*
